Swami Ramanand Teerth Marathwada University, Nanded has recently introduced the project work in UG and PG syllabi. It is found that, student have difficult task in presenting voluminous research in the form of research paper for scientific journals, seminars, conferences etc. Therefore, Swami Ramanand Teerth Marathwada University, Nanded has sponsored one day Regional Workshop on ***“Research Paper Writing & Presentation Skill”*** (RPWPS-2014 for M.Sc. & Research Students. Research & Consultancy Unit, N.E.S.Science College, Nanded is organizing this workshop to promote & make aware the students regarding research paper writing and its presentation for scientific research journal/seminars and conferences. This workshop will definitely help the students & researchers in writing & presenting this research work.

Research paper is one of the most important and tiring tasks for students. Research paper is type of recognition for the researchers. But writing a high quality scientific research paper is one of the most difficult and important aspects of scientific research. Student generates research data on a topic it will allow them to make judgments and interpretations. It is the culmination and final product of an

involved process of research, critical thinking, source evaluation, organization, and composition. It is, perhaps, helpful to think of the research paper as a living thing, which grows and changes as the student explores, interprets, and evaluates sources related to a specific topic.

Keeping in mind in order to make students an experienced researcher and writer, he/she must not only pay particular attention to the selected topic but also become skilled in researching, outlining, drafting, and revising.
